

*Triton® Application Case Study***Use of Triton Vacuum Systems in Offshore Barite Recovery Operations**

A customer needed to recover 150,000 pounds of Barite on an offshore rig, and collect it into supersacks. Triton's "Solids Recovery Package" proved to be a cost-effective answer to this challenge.

Triton's Solids Recovery Package consists of a Triton Vacuum unit, a Triton Collection Tank for primary containment of the recovered product, and a Triton Baghouse to clean up the dust before the air flow through the vacuum pump.

Triton Vacuum Systems are low cost, highly portable, and easy-to-operate. They are available in skid or trailer format, and driven by an electric motor or a diesel engine. Contact Triton at 225-637-3700 for more information.
